Amendments to the Specification:

Please amend the paragraph at page 11, lines 1-15 as follows:

The built-in flash memory 11 has previously stored thereinto a control program and various sorts of data. This control program is executed so as to cause the DSP/CPU 3 to control the various units of the digital camera 1. The various sorts of data are used while the DSP/CPU 3 is operated. Since the DSP/CPU 3 is operated in accordance with the above-explained control program, this DSP/CPU 3 executes the control operations such as the above-explained AF and AE operations, and furthermore, may function as a setting means (language setting means and language selecting means), and a reading means of the present invention. Also, the built-in flash memory 11 corresponds to a storage means of the present invention, and has previously stored thereto such data which constitute both a proposed language setting table "T1" shown in FIG. ~~24~~ 2A and a document table "T2" indicated in FIG. 2B.
